Dear Sir/Madam:

I have lived in the State of Nevada since 1967..I lived in Pahrump when testing was still taking place @ the test site..The beautiful clouds of ? that drifted over the clear blue skies were really something to see. I think that this state has provided more than enough for the United States.. No other state allowed the nuclear testing that we allowed..Now it is time for all states to take care of their own waste..Nevada may seem a barren wasteland to other people, but it is the state that I choose to call my home. All of the dangers that go along with the transporting of such waste should make you realize that this is not the answer you need..Be thankful to the State of Nevada for providing the land for the testing, and let each state find their own land for their nuclear waste. Thank you for taking the time to read my comment..

Mary Groves
